PROFILE

I consider myself a hard working individual, who always likes to keep busy pushing myself to learn new experiences. I have recently completed a Full-stack Web Developer course, however when looking for a job I notice that the majority of employers were seeking people with PHP experience. This led me to also purchase several more courses in PHP, Laravel, and PHP OOP. To help my knowledge and chances of employment. I am also willing to travel or work from home. I am currently working through the last of the courses I have purchased is from www.udemy.com. The details of the courses I have purchased are;

- PHP for Beginners - Become a PHP Master - Completed
- PHP OOP: Object Oriented Programming for beginners - Completed
- PHP with Laravel for Beginners - Started

EXPERIENCE

FURLOUGH PERIOD

During the COVID-19 outbreak I have been keeping myself occupied by increasing my knowledge in different areas. I completed a Fullstack Web Development course from Code Institute (<https://codeinstitute.net/>). I passed with Second Class Honours. [View Certificate](#). I have also started to learn XCode & Swift that came with my MacBook.

DUTY MANAGER & STOCK TAKER, SHARD RIVERSIDE INN— MAR 2017 - PRESENT

During my time at the Shard, I started off as a waiter and within three years. I gained three promotions these were, Bar & Accommodations Manager, Duty Manager and Stock Taker.

This was through my good work ethic and my interest in improving on things in the hotel. On my first day I came up with a way for the owner to make this till accounting more efficient, this then went on to me learning the back office software so that I wouldn't have to rely on the company who is meant to offer support, and to me taking the role of stock taker for both establishments. So they saved on some money by not employing professional stock takers like they did before, I brought it to their attention that the till software could track stock.

EDUCATION

Code Institute - Fullstack Web Developer, Second Class Honours 2020

Milton Keynes College - Horticulture Level 2, Completed with Distinction

Open University - Book Keeping Level 1 - Distinction

SKILLS

I consider my Aspergers to be an advantage when it comes to computers, because it increases my interest and knowledge in them. I also like doing things with the raspberry pi's, at the moment I have three of them each doing a different job. They are a file server, web server and a smart home hub.
